

Dear FCC.       satellite radio provides a valuable service with not only music but with services such as traffic, weather, sprorts, and talk shows. This is no different than cable tv.   Please reject the monopolistic and opportunistic agenda of the NAB petition 04-160 and support satellite radio (XM)   ability to provide the kind of programming that everyone else is free to provide in this free democratic country.       thank you for your time and consideration.  
respectfully,   marlon gaines
